

# Take It Away

## Death On Two Wheels

Stupid simple mind games, pushing 'til I'm insane  
Working through the day and night  
Strutting with my headphones, no one knows what I know  
Got no time to be polite  
And the world says, "baby don't worry, baby don't worry at all"  
Roller coaster seat belt, motion sickness soft shell  
Maybe I'm just not cut out  
But I can feel it, no one can steal it  
They're gonna call my name  
Not gonna stop now, not gonna step down  
'Cause I can hear 'em say  
Take it away, take it away, take it away, yeah! (2X)  
Leading with my right hand, can't afford the name brand  
Gotta give it all I got  
Had a taste of lime light, sweet and sour just right

Now I can't escape the thought  
And the world says, "baby don't worry, baby don't worry at all"  
Praying running up hill, stage is my cathedral  
Baby I can see the light

### CHORUS

Bright flashes, full glasses  
Now get up sing your song for the masses  
Close both eyes, feel the sunrise  
You thank God for the journey when you realize  
Long nights mean nothing at all  
Bright lights you can hear 'em call  
Got my poster up on your wall?  
We're in a storm now keep yourself calm  
Stop - hit it - break - kill it  
Anybody know the odds when I deal it?  
Anybody get up the guts to play?  
'Cause you only live once better live for the day
