

We Live, We Love, We Grow

[Ryan Peters](#)

How do we celebrate dear
After all these years
On a build in holiday, the memories remade
How do we sleep at night love
All the stars above, pillow talking softly
We fall into a dreams And on and on we go this love still on fire
On and on we go, we move to inspire
On and on we go, we live we love we grow How do we make it through
Every thing we do
With faith in one another
Mending everything And on and on we go this love still on fire
On and on we go, we move to inspire
On and on we go, we live we love we grow We're still on fire
We're still on fire And on and on we go this love still on fire
On and on we go, we move to inspire
On and on we go, we live we love we grow We're still on fire
We're still on fire
