To Live By The Sword

Saxon

To follow the code of honor
Die with a sword in your hand
That is the way of the warrior
Your forefathers left on the land
To live by the sword, you must die by the sword
Trained in the way of the masters
Disciples of conflict and war
The bow and the blade are your weapons
Your brothers have fought here before
Forged in the land of the shogun
A blade of unbreakable steel
The samurai spirit is with you
To battle you carry their seal
To live by the sword, you must die by the sword
Warriors born to be free
To live by the sword, you must die by the sword
Warriors born to be free
To live by the sword
Born in the shadows of Fuji
From out of the ashes you rise
To fight on the side of the emperor
Like many before you that died
You courage can never be broken
Warriors fearless and brave
You follow the ancient traditions

Sworn to your ancestors grave
To live by the sword, you must die by the sword
Warriors born to be free
To live by the sword, to live by the sword
To die by the sword, warriors free
To live and to die by the sword
To follow the code of honor
Die with a sword in your hand
That is the way of the warrior
Your forefathers left on the land
To live by the sword, you must die by the sword, yeah
The samurai spirit is with you
A blade of unbreakable steel

Forged in the land of the shogun
To battle you carry their seal
To live by the sword, you must die by the sword
Warriors born to be free
To live by the sword, you must die by the sword
Warriors born to be free
To live by the sword, to live by the sword
To die by the sword warriors free
To live and to die by the sword
