

Track

Lewis Taylor

This wicked streak I have in me that I never wanted you to see
In my heart I hope and pray
I'm not this way but I am
Girl I try but I just can't seem to find
Any way to get you off my mind
From now on I wanna be a better me
If I can
Friends say that I've changed
I've gotta get over this
Such a sad sight to see
What in the world we're gonna go
Other ladies try to take me by the hand
But they don't understand that I'm nothing without you
Madness fear and jealousy
All I have to keep me company
And my mood is black as the darkest cloud
Shouldn't be allowed to feel this way
Now I'm so afraid all the bad things in me
Are gonna get together
Make a whole so big and strong
Bad luck and trouble be my only friend
'Cos I can't pretend for much too long
The night can be cold, you see
Oh baby I try the best I can
I'm all along won't you talk to me
Said I'd never be lonely
Said I'd be your one and only man
Loves died of a broken heart
Friends say I should get over it
I don't want to
