

# Come In The Morning

## Moby Grape

Come in the morning  
When the sun is shining  
With the sun beams climbing  
Bring me a dream Above my head, yeah  
To light another day for me Stay with me now, tomorrow... Come what may  
Girl, come what may  
When most people are sleeping  
Drifting in slumber  
Come in the morning  
While others are keepin'  
A light burning brightly Come with me  
I'll show you the way Cause if you're lonely  
Stay with me now, tomorrow...  
I'm asking only  
Enjoy the wonders  
You gotta let me know  
Before you have to go  
Of life and love  
Let me know Come on, I need...  
Stay with me now, tomorrow...  
Come what may, come what may... Come what may, come what may...  
Come in the morning  
Bring me a dream  
When the sun is shining  
With the sun beams climbing Above my head, yeah  
To light another day for me!  
Come what may Stay with me now, tomorrow...  
Girl, come what may You know I love you (Come what may)  
You know that I need you (Come what may)  
I don't want nobody else, baby (Come what may)  
I don't need nobody, nobody else, baby (Come what may)  
I just want your love (Come what may)
