

Straight Down the Middle

[D2E](#)

She came along to see us play
Then hung around, wouldn't go away
She said she's got nowhere to stay, why don't you
Stay with me for a couple daysCause everybody's fallin' to pieces,
Everybody's falling apart
I've seen the scars of your little broken heart but
They don't know a thing about usMy only thought was this
To spend some time, steal a little kiss
Still has that other guy in her sight
Will he be there when I turn on the lightCause everybody's fallin' to pieces,
Everybody's falling apart
I've seen the scars of your little broken heart but
They don't know a thing about usAnother town another day
Another strange and lonely place
The lonely road is no place to be (backup vocals) cause baby
I'm not the same when you're not with meCause everybody's fallin' to pieces,
Everybody's falling apart
I've seen the scars of your little broken heart but
They don't know a thing about us
