Evolution Revolution Love

Tricky [Ft. Ed Kowalczyk (From Live) & Hawkman]

Now that you got it right
Bring love and it'll make it alright
Bring love and we'll take it tonight
Now that you got it rightWho wants the sinner
Comin' 'round for dinner
Who needs effects
Who needs to pay for sexWhen they drop the bomb
Who will stay calm?
Blood would spill
Who would you kill?Now that I understand this right
Let me take it to the mike
This revolution has just begunNow that I understand this right
Let me take it to the mike
This revolution has just begunWalkin' down the road
With my little rude gun
Top of my gun, pocket for fun
Block on my tongue
Top of my earth, tip of my birth
Top of my deathTip of my breast, top of my chest
Tip of my guess, I've got the singles
I got the jingles, bet you eat Pringles
Walkin' on the road with my little rude gunNow that I understand this right
Let me take it to the mike
This revolution has just begunNow that I understand this right
Let me take it to the mike
This revolution has just begunSteppin' on the street with my little rude girl
Tip of my toes, top of my heart
Top of my world, top of my earth
Top of my rock, tip of my blockNow that you got it right
Bring love and I'll make it alright
Bring love and we'll take it tonight
Now that you got it rightNow that I understand this right
Let me take it to the mike
This revolution has just begunShe was born in the Ghetto
Outside the Bronx
In a project blocks
Time stands stillIt don't tick, it don't tock
Top of my sun, tip of my land
Top of my chest, tip of my breast

Top of my earth, tip of my rockWalkin' on the road
With my soul in my hand
Tip on my toes
Top of my spanNow that I understand this right
Let me take it to the mike
This revolution has just begunNow that I understand this right
Let me take it to the mike
This revolution has just begun
Just begun, just begun, just begunNow that I understand this right
Let me take it to the mike
This revolution has just begunNow that I understand this right
Let me take it to the mike
This revolution has just begun
Now that I understand this right
Let me take it to the mike
