Collide (feat. Avicii)

Leona Lewis

I'll pick you up when you're down
Be there when no one's around
When you're in unfamiliar places
Count on me through life's changesI'm in tune with how you feel
Everything bout this is real
When you're in unfamiliar places
Count on me through life's changesYou're all I want, yeah yeah
I know you're the one, yeah
You're all I want, yeah
I know you're the one, yeahCrash into me
At full speed
Crash into me
We can collide, we can collideCrash into me
At full speed
We can collide, we can collide
We can collide, we can collideWhen you're in unfamiliar places
Count on me through life's changesKnow that you're never alone
In me you can find a home
When you're in unfamiliar places
Count on me through life's changesYou're all I want, yeah (yeah)
You're all I want (oh), yeah (yeah yeah)
You're all I want, yeah (you are the one)
I know you're the one, yeah (you are)Crash into me
At full speed
We can collide, we can collide
We can collide, we can collideCrash into me
We can collide, we can collide
