Synchronicity I

Memories and past whispers

With one breath
With one flow
You will know
SynchronicityA sleep trance
A dream dance
A shared romance
SynchronicityA connecting principle
Linked to the invisible
Almost imperceptible
Something inexpressibleScience insusceptible
Logic so inflexible
Causally connectible
Nothing is invincibleIf we share
This nightmare
We can dream
Spiritus mundiIf you act
As you think
The missing link
SynchronicityA connecting principle
Linked to the invisible
Almost imperceptible
Something inexpressibleScience insusceptible
Logic so inflexible
Causally connectible
Nothing is invincibleWe know you
They know me
Extrasensory
SynchronicityA star fall
A phone call
It joins all
SynchronicityA connecting principle
Linked to the invisible
Almost imperceptible
Something inexpressibleScience insusceptible
Logic so inflexible
Causally connectible
Nothing is invincibleIts so deep
Its so wide
You're inside

SynchronicityEffect without a cause
Sub-atomic laws
Scientific big pause
SynchronicitySynchronicity
Synchronicity
Synchronicity
