

# Phoenix Wind

## Yeasayer

Time is just a number, it takes you by the hand  
And descending like the shepherd dog buried in the sand  
Your magnet eyes move fluid in my veins  
A Phoenix wind is murdering the planes? I kinda feel like, a wind is coming soon  
I kinda feel like, the clock is well past doom  
The other face of, illusion not as weak  
Has been revealed by, the tricks of all asleep? When they said when they said your mind could get better  
Was a bulb above your head  
No more trivial wagers you could turn the tables  
Not a single page was read When they said when they said life would get better  
If we?  
And the hardest winds and the flattest roads  
Were the only ones ahead I kinda feel like, a wind is coming soon  
I kinda feel like, the clock is well past doom  
The other face of, illusion not as weak  
Has been revealed by, the tricks of all asleep Nothing's as it seems, nightmares are healing your dreams  
Nothing's as it seems, when your nightmares are healing your dreams  
Healing your dreams Nothing's as it seems, nightmares are healing your dreams  
Nothing's as it seems, when your nightmares are healing your dreams
