

# Closer To You

## Young Love

if i put my hand out would you put yours in mine? all of our answers questioned in time don't let your fears try to tear us apart. i wanna get closer to you i'm on the outside looking in tell me our love is real you know that i will understand. i wanna get closer to you closer to you i wanna get closer to you closer to you. this is bigger bigger than you or me endless grains of sand waiting by the sea we'll let the current wash us away i wanna get closer to you i'm on the outside looking in tell me our love is real you know that i will understand i wanna get closer to you closer to you i wanna get closer to you closer to you i imagine how you feel could be the only thing that's real if you would let me in then i would know for sure
