Possible

Chris Medina

Never thought it was possible to be down here again
And never thought it was possible to be
Never thought it was possible to meet this way again
Isn't this the way it oughta be now to me to meet me here
I can only see what life will be outside to meet me here
Never thought it was possible to be damn here again
And never thought it was possible for me to grow
'cause if you take back the empty cold
I will be there for you
I will be there forNever thought it was possible to be damn here again
And never thought it was possible to be
Never thought it was possible to meet this way again
Never thought it was possible
Never thought it was possible
Never thought it was possible
