We'll Never Know

Roman Fischer

Hey you, I got something you need
The secret's gonna set you free
And everything you think you know it ain't nothingThe sacred truth from the holy light
The daybreak from the darkest night
When all the wandering souls are looking for somethingI'll say it real slow
(For God's sake now you gotta believe)
What you gotta know
(The wisdom's gonna set you free)The dawn's early light
(God son and the holy light)
Is starting to show
(Your beacon through the darkest night)We've all been deceived
(Not now but someday you'll see)
You better believe
(What it is to believe)
What we'll never knowThe star, cross and the crescent sign
The reason that we pray at night
When you lose your nerve
You know that you gotta serve someoneA prophet or a sacred cow
You know it doesn't matter now
Pick one of the above
It's better than bowing to no oneI'll say it real slow
(For God's sake now you gotta believe)
What you gotta know
(The wisdom's gonna set you free)The dawn's early light
(God son and the holy light)
Is starting to show
(Your beacon through the darkest night)We've all been deceived
(Not now but someday you'll see)
You better believe
(What it is to believe)
What we'll never know'Cause in the end you'll see
It's not really what you believe
(What you believe)
The only one sure thing is that
Life's filled with uncertainty
(Uncertainty)And then the truth could be
That life's just one big joke
But we'll never know
We'll never know, we'll never know

We'll never know, we'll never know
We'll never know, we'll never know
We'll never know
