

Glimpse

Finger Eleven

Tell me what you need to hear and I'll tell it to you again
I can fake it all if you can too
Will it stop from bleeding naturally enough
Can I hold my tongue in silent the words are slow and repeating
I know you why don't you take what you need and then go away
I know you why don't you take what you need Die to get another glimpse in
So I'll watch the water rinse
Until we all get washed away
I never needed someone comforting me I don't think I told you how I feel tonight
You perfect little angel your beautiful even now
I know you why don't you take what you need and go away
I know you why don't you take what you need Die to get another glimpse
So I'll watch the water rinse
Until we all get washed away
I never needed someone comforting me
Down I go
