

# Echo

## Trapt

Close my eyes  
Let the whole thing pass me by  
There's no time  
To waste asking why  
I'll run away with you, by my side  
I'll run away with you, by my side  
I need to let go, let go, let go, let go of this pride, yeah  
I think about your face and how I fall into your eyes  
The outline that I trace around the one that I call mine  
Well time that called for space, unclear where you drew the line  
I don't need to solve this case and I don't need to look behind

Close my eyes  
Let the whole thing pass me by  
There is no time  
To waste asking why  
I'll run away with you, by my side  
I'll run away with you, by my side  
I need to let go, let go, let go, let go of this pride, yeah  
Do I expect to change the past I hold inside?  
With all the words I say repeating over in my mind  
Well some things you can't erase no matter how hard you try  
An exit to escape is all there is left to find

Close my eyes  
Let the whole thing pass me by  
There is no time  
To waste asking why  
I'll run away with you, by my side  
I'll run away with you, by my side  
I need to let go, let go, let go, let go of this pride  
Until this echo, echo, echo, echo in my mind  
Until this echo, echo, echo, echo can subside, yeah

So I close my eyes  
Let the whole thing pass me by  
There is no time  
To waste asking why  
I'll run away with you, by my side  
I'll run away with you, by my side, yeah  
I need to let go, let go, let go, let go of this pride  
Until this echo, echo, echo, echo in my mind

Until this echo, echo, echo, echo can subside
