

Ketamine

Trampoline

If you're feeling kicked in
And as far down as you've ever been
There's only one answer...
Try Ketamine.

It's main use of course
Is anaesthetic for horses
But it can be a gift
If you ever need a lift
You gotta work that bit out
Because when you're trying to cheer yourself up,
You can knock yourself out

I mean, you mean Ketamine,
I scream, you scream Ketamine
We all scream for Ket a mine.

Makes fantasies faster,
Take the right amount,
Avoid a mental disaster,
Be a zen grand master,
I know you can choose between Prozac and booze
But this life enhancer could be the answer,
You hear the weather girls say it's always a sunny day
When you go from A to B Via K
So forget Jim Bean,
You can live the dream,
Of the precise regime
With my old friend Ketamine
Just think of the force
To knock out a horse
You know what I mean?
My pal Ketamine
Can make you light-headed
You're pencil and leaded
Your mind might be fine
But your bladder is shredded.

But don't get me wrong,
This stuff is strong

And I must admit
It's not entirely legit

The best of a session
May lift your depression
Or even put you mentally unstable
On a mortuary table
Your eyes wide shut. Your big toe labelled.

I mean, you mean Ketamine,
I scream, you scream Ketamine
We all scream for Ket a mine.
