The Night They Blew Up The Moon

Hot Rod Circuit

Children go to sleep
Your mother's been workin' hard all week
Doin' the dishes
And breakin' off switches
Sugar coated so sweet
A feeling that goes so damn deep
Someday you'll understand
The master plan
It's the risk we take
It's the chance we make
It's the risk we take
It's the chance we make
(repeat all)
Let's bus to the safest place
And take the next ship into outer space
You know you lost it.
Take the next bus to the safest place
And take the next ship into outer space
You know you lost it.
