

# Sister

## Cross Canadian Ragweed

I use to get stoned on my sisters record collection  
Gold and platinum on vinyl was the closest thing to perfection  
Rock & roll, acoustic guitar  
Not even comfortable with who you are  
I'd blow the roof if I had a fast car I changed my mind in my best friends El Camino  
He blew my drums that summer night in El Reno  
Turning up the STP, turning down the LSD  
On a bottle of booze and the best of his cousins weed What if I was the one that you warned me about  
You were the one that needs to come around  
We got together and we worked it out  
No one would shut us down.  
If it all dried up and blew away  
With a handful of checks on a rainy day  
Would you turn around or would you stay  
Would it matter anyway What if I decided to take the nation  
I'd break the knob just so I could feel the frustration  
Yeah, turn it up til you hit top speed  
Yeah, its all that I'll ever need  
When you bear your heart  
You better be prepared to bleed {Repeat Chours}
