Element 101

Falling deep into this dream-like state
Wake myself up, don't be late
All these dreams I seem to overrateBe there when you call
Be there when you change your mind and I'll be there
Be there when you, be there when you call
And I'll be there when you find that
I've been what you've been looking for all alongConvince you, I would go anywhere with you
Oh darling, what else would I want to do
I still would go anywhere with you
Anywhere with youBe there when you call
Be there when you change your mind and I'll be there
Be there when you, be there when you call
And I'll be there when you find that
I've been what you've been looking for all alongWithout you, I am stuck in this dream too
Oh darling, what else could I do, I love you
But I am stuck in this dream too with youI tried to win your favor once
Looked at you and tried again now twice
My world hurts now that's too great a priceFinally meditating on that which I've never really known
Time shows me that I have grown
Finally meditating on that which I've never really known
Time shows me that I have grown
