

Waiting on the Light to Change

[Randy Travis](#)

This old road has taken its toll
I've been broke down but now I'm back on a roll
Got it in gear, sittin' on go
Just waiting on the light to change I'm going places straight to the top
I'm all revved up, my engine's hot
Just temporarily come to a stop
And I'm waiting on the light to change I took a little detour, wrong way down a one way street
I had to learn the hard way, no short cut to easy street I lose my way now and then
But better days are just around the bend
I'm gonna get myself movin' again
I'm just waiting on the light to change I took a little detour, wrong way down a one way street
I had to learn the hard way, no short cuts to easy street Both my hands are on the wheel
My turn will come I know it will
From now on it's all down hill
I'm just waiting on the light to change
