

# Better Than It Used to Be

[Rhett Akins](#)

Now it ain't like me to talk about the way my woman makes me feel  
But since you asked and I've got a minute well gentlemen here's the deal  
If I told it's as good as this or that you might misunderstand  
So let me give you all a little idea of what's it's better than  
It's better than whiskey when you're cold  
Better than your favorite song on the radio  
Better than a feather bed when you've been loving all night  
And you've got to get some rest  
Better than punching out on payday  
And cruise control down the highway  
It's a whole lot better than it used to be  
And it used to be the best  
Now I've seen love that started to fade soon after that first kiss  
But let me make it clear right now that ain't the case with this  
It started out good, started getting better it never has slowed down  
And it's better than a bunch of you buying me another round  
It's better than whiskey when you're cold  
Better than your favorite song on the radio  
Better than a feather bed when you've been loving all night  
And you've got to get some rest  
Better than punching out on payday  
And cruise control down the highway  
It's a whole lot better than it used to be  
And it used to be the best  
Lordy, Lord I love that woman of mine  
And what we've got has got to be one hundred times better than  
It's better than whiskey when you're cold  
Better than your favorite song on the radio  
Better than a feather bed when you've been loving all night  
And you've got to get some rest  
Better than punching out on payday  
And cruise control down the highway  
It's a whole lot better than it used to be  
And it used to be the best  
Yeah, it's a whole lot better than it used to be  
And it used to be the best
