

Infect

Angelspit

Fill the air with heliocentric
Of human beings
Who do not behave like human beings
And they make this atrocity possible I like you
You look at me you're not fucked to the brain you see
Defy this
Were in a close mind like its like your 69
Dispose of You infect
Once again you're in my face again
Diluted
In your crooked line you try to keep a lie
Feel all dizzy
Never mind the devil, listen to what the voices said
To our amusement instead of together we sever
Never mind the devil, listen to what the voices said Don't pull away Simplify me
Despise me
You blow me kisses
The work don't mean anymore You infect
Infect
