Doomsday

Globus

(speaking foreign language)
Lex lata, pulvis et umbra cinis
Ultra tuum praesidium, consumimur igni plebis victis

You wake up believing
This day will end by evening
It's taken for granted
that seeds of life are planted
But nothing prepares you for nature's acts of virtue
It's doomsday, ascending, the world you know is ending

Seas will rise and the mountains will fall
with the power of creation
we will end in a fiery rage

(speaking foreign language)
Cantus immortale regnum
In aeterna prosay, infinitum
Luce, ressurectum
Excrucio, natura fieri mortis

These last days are death-throes
The ultimate inferno
No hope for survival
This doomsday is our final sign

Dark and grim, your fate will begin
In the fire and the pain
God will end on this doomsday

(speaking foreign language)
Gladius, in evertimitum, gloria, in excruciatus
Radio, vera sentimenti, termino, ab infuriate
Solvo rei, qui a serpentinus, maxime, amo anti teus
Malus perenisus, cruce invocale
Morte hasana, prosay fortuna
Mystrie, morte, sancte per dei
