

# All Night Doctors

## Bush

She saw the pieces of  
Her yesterday  
She was wondering  
How she's fade away  
Who would love her  
And breathe and listened in  
Where's that she had  
Made a difference?

He's a Soldier of misfortune  
Seven steps he make - one forward  
How the truth hurts  
Where lies the crystal lies

Try to wrap your arms  
Around our memory  
Maybe you were not  
Where you're meant to be  
Lord knows we're not who  
We think we are

All night doctors  
All night preachers  
All night girls to get you through  
Lost and wasted  
Hope is fading  
And I'm waiting here  
For You

Secret life of  
Unteriors  
Almost girls are superior  
Everyday I want  
This life for you and  
Every night it's the same  
On the waiting  
For the word of change  
For all the fighting  
To die away

Find comfort in  
Your memory  
I'm not where I am meant to be  
You Shine the world stops  
And god's a humble

All night doctors  
All night preachers  
All night girls to get you through  
Lost and wasted  
Hope is fading  
And I'm waiting here  
For you

Were You ever my love?  
Were You ever my love?  
I don't know (I don't know)  
I says

All night doctors  
(Were you ever my love?)  
All night Preachers  
(Were you ever my love?)  
All night Girls to get you through  
Lost and wasted  
(Were you ever my love?)  
Hope is fading  
(Were you ever my love?)  
And I'm waiting here  
For you

(Were You ever my love?)  
I don't... know
