

# Spend Another Night

Billy Gilman

I instantly knew when I saw you  
You and I would be forever  
Hearts never apart  
True from the start  
To each other and together  
There's nothing we can't do  
And until the end of time

If you tell me you'll be mine I'm never gonna spend another night  
Without you in my dreams for the rest of my life  
I'm gonna reach out to you honestly and try  
To give you what you need with all of my might  
'Cause nothing has ever felt  
So real and so right  
So I'm gonna never spend another night  
Without you in my dreams 'Cause you are so in my heart  
Even alone in the dark  
I can feel the light of our love shining  
We are so meant to be  
That we are definitely  
Destiny and there's no denying  
That I love you, though it's so cliché

There's nothing else to say But I'm never gonna spend another night  
Without you in my dreams for the rest of my life  
I'm gonna reach out to you honestly and try  
To give you what you need with all of my might  
'Cause nothing has ever felt  
So real and so right  
So I'm never gonna, never gonna, never gonna spend another night  
Without you in my dreams  
I'm never gonna spend another night
