

If U Think That U Know Me

Orianthi

As the light shines down
And it hits my face
Wanna feel your love in this empty space
And if you're just like me
Then you're searching for something
I've been on this road
And I need a friend
I've almost come to the very end
And if you're just like me
You're still looking for something So if you think that you know me
Put your hands up and show me
So I don't feel so lonely
While I sing my song
So if you think that you know me
Put your hands up and show me
So I don't feel so lonely
While I sing my song Have you ever felt like you didn't fit in?
Like there's somebody else inside your skin?
Well you're not alone
We all came here for something
Everyone was standing alone
Part of a tribe
They call it rock n roll
And a will to survive
It saves you so many times
And when we all go home tonight I think that you know me
Put your hands up and show me
So I don't feel so lonely
While I sing my song
So if you think that you know me
Put your hands up and show me
So I don't feel so lonely
While I sing my song
