Universal Garden

Yes

Looking up into the endless sky
Staring into the maze of time
Our existence caught in the blink of an eye
Imagining other words we try
Realizing somehow we're all part of this
Wondrous cosmical tapestryBeyond the sun, beyond the sky
Are where the real questions lie
Wanting to know where it begins
The puzzle piece we are missingStarlight, flowering endlessly
Through the universal garden
Garden aboveLooking up into the endless sky
Through space and time
Staring into the maze of time we'll fly
Our existence caught in the blink of an eyeRetracing years
Imagining other worlds we try, no fears
Realizing somehow we're all part of this
Blazing a new trail, wondrous cosmical tapestryBeyond the sun, beyond the sky
Are where the real questions lie
Wanting to know where it begins
The puzzle piece we are missingStarlight flowering endlessly
Through the universal garden
Garden aboveInvestigate the science of illusion
We benefit without knowingOur time is man made
Our fear is man made
Delusion man made
Religion man madeLove is forever flowering endlessly
Through the universal garden
Garden aboveBeyond the sun, beyond the sky
Are where the real questions lie
Wanting to know where it begins
The puzzle piece we are missin'Beyond the sun, beyond the sky
Are where the real questions lie
Universal garden
