Champion

Cody William Falkosky

you were in the darkest part got me emotion
i would do whatever to help you
baby let me take your pain and hold you with the broken
i would do whatever to free you
i would come running in the night if you need it
i would come fight it by your side
when the storms are talking
and the shadows get burned
let me be your lifeline reach
when the night is ice thin
when the clouds are blacker
baby come hold onto me
i could be your champion x5

i am never far away, your not in the open
i would do whatever to keep you
i would come running in the night if you need it
i would come fight it by your side
when the storms are talking
and the shadows get burned
let me be your lifeline reach
when the night is ice thin
when the clouds are blacker
baby come hold onto me
i could be your champion x5

i would come running in the night if you need it
i would come fight it by your side
when the storms are talking
and the shadows get burned
let me be your lifeline reach
when the night is ice thin
when the clouds are blacker
baby come hold onto me
i could be your champion x7
