

# Tell Me

## Joan Armatrading

Call me any time  
That you wanna call  
Tell me anything  
Make it big or small  
I can take it or leave it  
If you wanna stay in  
I can take it or leave it  
If you wanna go out  
I know all of your secrets  
And you're the same with me  
I know where all the bodies are  
Your secret is safe with me  
Tell me anything  
Tell me  
Tell me  
Tell me  
Let our friendship survive  
Bear the brunt of a storm  
All I want you to do is call Not in front or behind  
But right there by my side  
When you need me just call You rely on me  
I depend on you  
I can dare you on  
You double dare me to  
We can dare to be different  
But at the same time  
We must be different together  
And when we were younger we would always compete  
And the winner would taunt  
Na na na na na na  
Tell me anything  
Tell me  
Tell me  
Tell me  
While we're searching for love  
Of the intimate kind  
Our friendship will always be Look to the north star  
See how constant it shines  
Like the bond that ties us together Love is the answer

Love is what heals  
Let's stay together  
Friends  
Love is the answer  
Love is what heals  
Let's stay forever  
FriendsFriends foreverLet our friendship survive  
Bear the brunt of a storm  
All I want you to do is call  
Call me anytime  
That you wanna call  
Call me day or night  
I don't care at allI can take it or leave it  
If you wanna stay in  
I can take it or leave it  
If you wanna go out  
I know all of your secrets  
And you're the same with me  
I know where the bodies are  
Your secret is safe with me  
Tell me anything  
Tell me  
Tell me  
Tell meLet our friendship survive  
Bear the brunt of a storm  
All I want you to do is callLet our friendship survive  
Bear the brunt of a storm  
All I want you to do is call
