Have you ever Been in Love

Cï¿½line Dion

I never knew I could fly
But something is taking me higher than ever
Like something inside is lifting me up
Until Im touching Heaven
No matter what the world may bring
It all comes down to one thingHave you ever been in love?
Have you ever noticed how
The sky never seemed so blue?
The whole worlds in time with youHave you ever known that someone
Is gonna be the one?
And no matter what you do
The sun still shines on you
Like an Angel from above
Have you ever been in love?And if he takes my hand
Im carried away with the force of a river
And when there are mountains ahead
Theyre easy to face if we climb them together
Whatever dreams the night may bring
It all comes down to one thingHave you ever been in love?
Have you ever noticed how
The sky never seemed so blue?
The whole worlds in time with youHave you ever known that someone
Is gonna be the one?
And no matter what you do
The sun still shines on you
Like an Angel from above
Have you ever been in love?No matter what you do, yeahHave you ever been in love?
Have you ever noticed how
The sky never seemed so blue?
The whole worlds in time with youHave you ever known that someone
Is gonna be the one?
And no matter what you do
The sun still shines on youHave you ever been in love?
Have you ever noticed how
The sky always seemed so blue?
The whole worlds in time with youHave you ever known that someone
Is gonna be the one?
And no matter what you do
The sun still shines on you

Like an Angel from above
Have you ever been in love?Yeah, yeah, have you ever been in love?
