

# The Mission

## Thirty Seconds to Mars

I open up my head inside  
And find another person's mind  
I'm gonna take this chance I've got  
I run denying as we speak  
Hiding my face among the weak  
Some say their day is on the way Into the wild  
I'm with a mission  
Over the hill  
Come here with me Into the wild  
Into the wild  
High above the serpentine  
I cross below the well-worn lines  
Entangled in a missing memory  
I've had an oversight  
I formed this sword that will give rise  
To something some new world is here to seize Into the wild  
Into the wild I love you this is a dream  
I'm starting it's easy to see  
To find someone else  
someone who believes  
And I know it  
I see what you mean Into the wild  
I'm with a mission  
Over the hill  
Come here with me  
Into the wild  
I'm with a mission  
Over the hill  
Come here with me
