

Intro

Kool Keith

So what do you think doctor? was i....

I didn't mean to.

Scientific detachment. ha!

Professional ethics I'm not just a doctor, I am a man

Doctor I didn't mean to!

I have desires. I have needs

I know you have needs and I know that you have desires You know it gets bigger and bigger inside of me until
it's...i feel it...it

Explodes and I sprayed myself all over the wall

I think I have a way to cure you

I like it when you get bigger and bigger but I don't want you to explode all Over the wall

Now doctor you just lie down...it's time you let me take care of you

... medicine what I need

Ohh... mmmm I wish I had a doctor like you...so gentle
