

Endless Struggle

Throw the Fight

Inside all of us has
Someone, someone much more
View the truth
Do you know when it's coming out?

And how
Can you stay on top
And how
Can you stand up when
Things will change, Things will change

Take my ashes and spread them quick
We've had enough

Save me from this
All of it more than I can take, I can ta-ake
Push your way through make your way up to the stage
Let us see your face

This is forward fighting, for- stand guard or let it tear you down
I'm with your life(I'm with your life)
Now forwards, waiting for yourself

And then, we will come
We will come forth like the sun
Not just (Not just turn!) Turn around, and then run

Take my ashes and spread them quick
We've had enough

Save me from this
All of it more than I can take, I can ta-ake
Push your way through make your way up to the stage
Let us see your face!
