Trap Doors

Broken Bells

Walk out before you make it worse on yourself
Now's not the time for that elegant laugh
Digress from the people once by your side, once by your side
But now that it's over, you have to pick up and just start again, start again
Falling to earth and you're covered in ice
You're burning yourself and your challenge to winter
Gotta clip the lines and move for yourself, just move for yourself, love
Now that it's over, you have to pick up and just watch your back
Watch your back
And close your eyes to us
Fight fire
Trap doors to endless wisdom
Young lad, have we grown too tired longing to find?
Learned that in time if you want it to end
Your life at this temperature, life underwater
You gotta let these fools all trample themselves
They trample themselves just dying to enter
You're preaching to the choir so turn around, turn around
And close your eyes to us
Fight fire
Trap doors to endless wisdom
Young lad, have we grown too tired longing to find?
And close your eyes to us
Fight fire
Trap doors to endless wisdom
Young lad, have we grown too tired longing to find?
