Closer (feat. Logkil)

Melissa Otero

I'm waiting for you from across the room
Please make your first move
I want to feel you touch my skin
Don't keep me waiting, just beginI take a step to try and entice
I'm getting close to your warming eyes
My private thoughts aren't enough
Don't make me ask you twice!Closer, I've been waiting for so long
Pull me closer, it feels so good it can't be wrongDon't be a flirt, act on it now
My fever will break somehow
You need to pull me to your chest
But hold me back as I undressPress your lips softly against mine
Baby give it one more try
Explore me through as you confess
You've put me in unconsciousnessCloser, I've been waiting for so long
Pull me closer, it feels so good it can't be wrong(LogiKIL)
Let me hold you close and take it far
Go for broke and break the odds
You love that real hate the frauds
I love that dress baby take that off
I can tell that u like that
From the way ur lips curls when u bite that
Let the flame unfurl and ignite that
No hats in the club u my night cap
From across the way
I can tell you want it all today
Let loose get involved and play
Caution to the wind throw it all away
Let the fun begin let me touch ya skin do it all again when it's over
But this club ain't big enough for us and them so we gotta start now by gettingCloser, I've been waiting for so long
Pull me closer, it feels so good it can't be wrong
