

# Fallen Angel

## Meat Loaf

I took one look and something snapped I said I love your eyes --

You took my heart you took my breath away --

I felt my temperature rise you said you've never loved a man this

Way

That it was heaven you were to stay But now you're just another fallen angel

And I hope that the fall didn't do you no harm

And now you're just another fallen angel

Falling into -- somebody else's arms I took one look and I was paralyzed and was in paradise--

I must admit that when I first laid eyes you had me hypnotized --

You said I'm sorry but I don't say much

But I'm in heaven when I feel your touch Follow your own road baby I'll be there when you need me

To love and to comfort and what he got ain't

Enough to keep you in the air

Angel, I'll be there
