

# In Orbit

## Man Overboard

All that I'm seeing around me  
Bright shining stars that abound me  
Suddenly out of control  
Rather it catches my soul  
Don't know what's up or down  
Somehow I feel like the clown  
Maybe someday I will wake up  
To find that it's all really made up  
Going in orbit with you  
Oh yeah, that's all that I do  
Going around to the light side

Going around to the dark side  
Behind me a gray big nothing  
I think that we really had something  
I don't have to fear a black hole  
Out here I'm sure of my role  
All that I am is weightless  
All that I see is timeless  
Going in orbit with you  
Oh yeah, that's all that I do  
Going around and around  
I'm going in orbit with you
