Remote Controller

Bodyjar

Sorry I've got things to do and say
I've listened long enough today,
I'll keep my things,
in my control but there's information you withhold
and I've heard everything you said about tradition.
And everything they say to you,
it must be true, to you.
And you can keep your good intentions,
you can have your point of view,
and I will listen very closely,
just don't try and change mine.
Who controls everything I see,
what I know you dictate to me.
I'll change the station
and the way I see things told to me in rays,
I've heard everything you said about tradition.
And everything they say to you,
it must be true, to you.
And you can keep your good intentions,
you can have your point of view,
and I will listen very closely,
just don't try and change mine.
And you can keep your good intentions,
you can have your point of view,
and I will listen very closely,
just don't try and change mine.
What I know you dictate to me.
What I know you dictate.
What I know you dictate to me.
What I know you dictate.
Who controls everything I see,
what I know you dictate to me.
What I know you dictate to me.
