

Lets Take One More Rocket to the Moon

Erase

Let's take one more rocket to the moon
Before we wake I'll kiss your eyes and lie betweenAnd while you sleep is all around
Just look up in the air and find it
Just wish upon a star and find itIt's dawning, I'm gently falling
The rhythm of water and windows are white
Darling, soft as your pillow I'm slowly drowning
Go spiralling down as you catch your breathA keychain in your pocket just for luck
I hold it in and close my eyes to hide a tearAnd what we need is all around us
Just say a little prayer and find it
Just look up in the air and find itWalking into your life
Love without knowing, I'm out of my mind
Calling straight to your heart
I'm slowly drowning and morning is here as I catch my breathAnd what we need is all around us
Just look up in the air and find it
Just say a little prayer and find itWalking into your life
Love without knowing, I'm out of my mind
Calling straight to my heart
I'm slowly drowning and morning is here
