

New York City

Emigrate

I am lost in the world of lies
Mesmerize my nice
This guy's graves and building sights
So I'm feelin' so alive Whatever is clever
Whatever is clever will have to wait Thinking on the world as large
This city's got it all
Culture clash and sidewalk trash
Don't look you might fall And now we just feel like energy
New York City will never flee
And now we just feel like synergy
New York City is the place to be I'm gonna win, I'm gonna lose
I'm gonna chase till the end
And if you're walkin' in my shoes
You gonna make it all pretend Whatever's clever
Whatever's clever will have to wait And now we just feel like energy
New York City will never flee
And now we just feel like synergy
New York City is the place to be
