

Stay

Emmy Rossum

Hush now close out the light
No need to speak
Time will slow when we surrender
Whisper now over the edge
Head rush, are you still breathing?
Shiver, taking me higher
Stay, darkness take over now
Stay, no thinking twice
Stay for tonight the sound of your heart racing
Faster for me is what will save me
Whisper soft, anticipating this eclipse
Pulling you closer
Melting now covered in silk
Letting go into the stillness
Head rush, careful don't drop me
Shiver, taking me higher
Stay, darkness take over now
Stay, no thinking twice
Stay for tonight the sound of your heart racing
Faster for me is what what will save me
Faster for me, feeling you save me
Memorize every moment
Letting this love take you over
Just breathe and stay
Stay, darkness take over now
Stay, no thinking twice
Stay for tonight the sound of your heart racing
Faster for me is what will save me
Faster for me, feeling you save me, stay
