

One Way Street

Sammie

Sammie

Yeah

I'm back

Empire

Listen Riding round, head down, thinking what to say

Cause inside girl I know its gone come a day when I

Gone have to tell you, baby

I think that I fell out of love

Started so innocent swear to God it was

We was just trying to be homies

But it stepped up on me

Now I cant fight it and theres no use to lying She was with her friends

I, I met em somewhere

Hooked up with some friends cause I, I never go there

I wanted to see her more and more, I lost control

Now Im driving down this one way street babe I know the way Im headed is dead wrong

But I just cant leave her love alone

Its got a hold on me, taking control of me

But I don't mind, one way street babe

I can see the traffic coming head on

But I'm weaving through it like it aint nothing

Risking my life for your loving

Speeding down this one way street babe Yes I love you, but when Im with her

Girl it ain't no words that I can say to explain

The way that she makes me feel

Started with a kiss, a kiss became much more

It hurts to hear all this I know

But Im leaving it on the floor tonight

And I cant fight it, theres no use defying She was with her friends

I, I met em somewhere

Hooked up with some friends cause I, I never go there

I started to need her more and more, I lost control

Now Im driving down this one way street babe I know the way Im headed is dead wrong

But I just cant leave her love alone

Its got a hold on me, taking control of me

But I don't mind, one way street babe

I can see the traffic coming head on

But I'm weaving through it like it aint nothing

Risking my life for your loving

Speeding down this one way street babe
Risking everything for you, you
And I cant live my life without you, you
I live to make love to you, you
Im kissing every breath from you, you
Risking everything for you, you
And I cant live my life without you, you
I live to make love to you, you
Im kissing every breath from you, you
One way street babe
I know the way Im headed is dead wrong
But I just cant leave her love alone
Its got a hold on me, taking control of me
But I don't mind, one way street babe
I can see the traffic coming head on
But I'm weaving through it like it aint nothing
Risking my life for your loving
Speeding down this one way street babe
