Flow With My Soul

Adam Joseph

Verse 1
Soul flow, soon he leaves the stage behind
I can feel it through my veins and my lungs and my mind
It leaves me but comes back every time
I can feel it when I'm singin' to myself in summer time
Now, my soul don't know how to break your rules,
But my voice sure does outbreak these obstacles
Turnin' heads in my own way, redefining wasn't risque

Chorus
Just flow with my soul
We can look at each other as friends or foes
Just flow with my soul
You can step up to me or you can get up and go
Just flow with my soul
It can be our first chance or our last go
Just flow with my soul, just flow with my soul

Verse 2
Now, I'm not asking you to be best friends
Ain't gonna fight the world 'cause I know I will never win
Can't have it my way whether men are men
People are just who they are without their labels covering them
Now, my soul don't know how to break your rules,
But you're hating on me so I'mma take you to school
I think I need to fly away and let my soul lead the way

Chorus
Just flow with my soul
We can look at each other as friends or foes
Just flow with my soul
You can step up to me or you can get up and go
Just flow with my soul
It can be our first chance or our last go
Just flow with my soul, just flow with my soul

Bridge
The freedom fighters inspire legions divide us
My crew commits sins with biblical teachings inside us
Sometimes you can't help but you've got to come across holes

That barely take the time to reflect like Nosferatu
The path I travel is beaten and full of roadblocks
It was easier when I was younger watching Go-Bots
So what if I flow high that might only please my boys
Flow with my soul, cry me a river then drown out the noise
These words are by the therapy I deposit
To keep me from being asked out like J-Lo in Prince's Closet
More than something to rock with or companies sparks bliss
Captain of my penmanship, get used to me or it's mutiny
Because sometimes your crew can't hack it
They follow but soon become turncoats like reversible jackets
Walker Js in the fall back, those are the options
My liquor is true serum in the concoction
Got it?!

Chorus with Ad Libs
Just flow with my soul (Just flow...with my soul)
We can look at each other as friends or foes (We can look at each other)
Just flow with my soul (Flow)
You can step up to me or you can get up and go (Woah)
Just flow with my soul (Just flow)
It can be our first chance or our last go (With my soul, my soul)
Just flow with my soul, just flow

Outro
Just flow with my soul (Just flow, oh!)
We can look at each other as friends or foes (Friends or foes!)
Just flow with my soul (Woahhhh)
You can step up to me or you can get up and go (Step up to me, yeah yeah yeah)
Just flow with my soul (My soul)
It can be our first chance or our last go (Yes!)
Just flow with my soul (Flow)
Just flow with my soul (Soul!!)
