

# Fire

## Ladytron

A red cell, a perfect view out of the novotel  
Sat gently listening to this song  
It started over again

And the girl gets higher, the room's on fire  
If you want her, let it go, hello,  
The sun went in, and it started over again

Linking an encyclopaedia of nothing  
In half-written signatures and false names  
It started over again

And the girl gets higher, the room's on fire  
If you want her, let it go, hello,  
The lights went out and it started over again
