Temporary

Wayne

Most of this is filler use it anywhere you please
I'm not going to fight it out
And all the decoration that is getting such attention
Lacks a little gravity to me but no offenseCall me if you need me I would hate to think I let you down
And you can find me even when there's nobody else around
And temporary is what it is but I've got different bloodWhen you hear a whip do you focus from the fear of a little pain?
Always worked and never fade
These scars can always tell the story but it just ends up in vain
If you get scarred again the same wayCall me if you need me I would hate to think I let you down
And you can find me even when there's nobody else around
I don't know when this was new, only new to meYou call me if you need me I would hate to think I let you down
And you can find me even when there's nobody else aroundYou call me if you need me I would hate to think I let you down
You call me if you need me I would hate to think I let you down
You call me if you need me I would hate to think I let you down
