

# Stupid Kid

## Bright and Early

There are things that used to make me smile  
One of them was you for just a little while  
    You left me for dead so far away  
    I replaced you with fear and shame  
You'll be happy on the day I dieThere are things that used to make me laugh  
    But now they're deeply buried in the past  
        I left them there so far away  
        Replaced my humor with my pain  
I'll be happy on the day it diesRemember when I said, "I love you"?  
    Well forget it, I take it back  
    I was just a stupid kid back then  
I take back every word that I saidThere are things that used to make you cry  
    One of them was me for just a little while  
        Why is it that you had to say?  
        Goodbye in your special way  
You slashed the tires on my carRemember when I said, "I love you"?  
    Well forget it, I take it back  
    I was just a stupid kid back then  
I take back every word that I saidRemember when I said, "I love you"?  
    Well forget it, I take it back  
    I was just a stupid kid back then  
I take back every word that I said
