

Bullet Proof

Goo Goo Dolls

Do you listen to yourself?
Never live for someone else
Do you like the way you feel?
Nothing hurts when no one's real
She wants to shake this scene
Yeah, she wants to shake with me
She's not looking for the holes in all their lies I wanna bullet proof your soul
Would you like to lose control?
I won't let you fall until you tell me so What are we?
(Whatcha wanna be?)
Everything
(That ya wanna be)
All I need
(Right in front of me)
I've know before Would you come my way
Or did you burn out to the end?
Would you come my way
Should have listened when you called my name Yeah, she wants to tear you down
And she leaves without a sound
It's like fallin' backwards into no one's arms You're a bullet through my soul
And I'll never let you know
I won't let you fall until you let it go What are we?
(Whatcha wanna be?)
Everything
(That ya wanna be)
All I need
(Right in front of me)
I've know before Would you come my way
Or did you burn out to the end?
Would you come my way
Should have listened when you called my name Would you come my way
Or did you burn out to the end?
Would you come my way
Should have listened when you called my name
Should have listened when you called my name
Should have listened when you called my name
