

# Liberation

## Latent Anxiety

Verse A:

I hear your steps in front of the door.

I hear your keys fall down on the floor.

I hate the feel in this chilly den.

I hate the lies you will tell me then. Verse B:

You were so nice but turned out a crumb.

You were so smart but turned out a dumb.

You make me mad, you hot nasty girl.

You make me sick you proud boring swirl. Verse C:

We can't deny it's time to quit now.

We can't deny it's over somehow.

Let's stop this pain and fake having fun.

Let's stop this farce and say we are done. Chorus:

Liberation, liberation, liberation from this bad game.

Liberation, liberation, liberation from this damn shame.
