

What If

Darin

Just imagine how you feel
If you would be the one they're picking on
Would you would you be the who's gonna stand up strong Honestly
Would you let us lie break down and cry, oh
Would you would you would you
Never let nobody step on your right What if it was your brother sister mother father child
Then would it still be cool
Why can't you see your words are hurting
Everybody deserves to be themselves and no one else
So think before you move What about if that was you
That would the victim (victim)
Of the criticism and they treated you that cruel
What about if that was you
That would be bullied (bullied)
How would you feel if they were doing it to you What about if that was you
How would you would you would you feel
Honestly
How would you would you would you feel
If they were doing it to you Just imagine how you would feel
If everybody always laughed at you
Would you would you would you
They think it's okay with me and you If you were me
And the people 'round you were having you down now
Would you would you would you
Like if they did that to you
