# Follow Me

## REEMES

You live in fear and there is someone behind you
Follow me
You stay in between two groups fighting against the others
Follow me

Knives and gun stare
Dread's everywhere
Follow me

This is your life and not the end
But you're afraid
Follow me

You have to run, run brother, tune your life into another
You can follow me, follow me, follow me
You have to run, run brother, tune your life into another
You can follow me, follow me, follow me

Then in the light you can see
It's just the shadow, you and me
In the light you can see
It's just the shadow, you and me

You have to run, run brother, tune your life into another
You can follow me, follow me, follow me
You have to run, run brother, tune your life into another
You can follow me, follow me, follow me

You have to run, run brother, tune your life into another
You can follow me, follow me, follow me
You have to run, run brother, tune your life into another
You can follow me, follow me, follow me
